PRODUCT DIMENSION

PRODUCT DATASHEET

- **Item Model:** MG-eNVP-JNN
- **Channel:** Up to 4 Channel
- **Compression:** H.264/H.265 @ up to 80%
- **Protocol:** ONVIF / RTSP
- **Resolution:** 720p/1080p/4K(1CH)
- **Processor:** Quad-core ARM Cortex A57 MPCore Processor
- **OS:** Linux
- **Memory:** Onboard 4GB 64-bit LPDDR4
- **Ethernet:** GbE port x1
- **USB:** USB 3 x 3
- **Power Input:** DC 12V (3-pin terminal block)
- **Operating Temperature:** -20°C ~ 55°C
- **Humidity:** 95%@40°C (non-condensing)
- **Certificate:** CE, FCC, MIL-STD-810G
- **Dimension (mm):** 84 (L) x 102 (W) x 54.7 (H)
(3.30" x 4.01" x 2.15")
- **Weight:** 0.3kg

Sentry
Controller

OVERVIEW ▶▶▶

- HD Video Compression Gateway
- Low bitrate video streaming enhancement
- Transmit bandwidth reduced by up to 80%
- Storage space reduced by up to 80%
- Most suitable to deploy in remote critical infrastructure that bandwidth availability is limited
- Provide long hours of critical Video backup using only minimal storage space

SYSTEM FUNCTIONALITY ▶▶▶

- Compatible with all IP Cameras with ONVIF/RTSP protocol.
- Integrated with most Video Management Software.
- Provide video stream to Open Platform Architecture VMS for large scale deployment of thousands of cameras
- Addresses the obstacle of high bandwidth cost and low-quality video feed for real-time remote monitoring

VIDEO FORMAT ▶▶▶▶

- H.264 & H.265
- HD720p , HD1080p, 4K
- RTSP & ONVIF

KEY ADVANTAGES ▶▶▶▶

- Transmit HD video over Wi-Fi, 3G, 4G, 5G or Satellite
- Eliminates the pain of high bandwidth requirement
- Transporting high-quality video across low bandwidth public and private networks
- Transfer Large Video content over small bandwidth
- Reduce Storage requirement and cost
- Reduction of monthly data charges Operation cost.

KEY BENEFIT ▶▶▶▶

- Large Data over small bandwidth
 - Compressed + Decompressed on single hardware
 - No requirement for any decoder on receiving end
 - Supported by any open platform video management platform
-

REMOTE MANAGEMENT

Live View

Playback

Clip Download

Ultra-Low Bandwidth Video Stream Compression

Live View Stream
channel will be
Compressed for low
latency CMS display

Playback Video
channel will be
Compressed for low
latency CMS display

Selected Video Clips
will be Compressed
for Smaller File Size
faster download

Up to 80% Saving on Bandwidth resulting In Reduce Operational Costs
